

**LET'S OVERCOME
THIS CRISIS
TOGETHER.**

INDUSTRY'S BATTLE AGAINST
COVID-19.

A simple action to avoid Coronavirus

Why do I need to stay 2 meters away from people at work and in the street?

Physical distancing from others is the most effective way of avoiding coronavirus contamination.

Saliva droplets can be projected more than 1,5 meters from an individual.

The less people infected, the better the medical attention will be for those who need it.

To reduce the number of infected people and save lives.
