

**LET'S OVERCOME
THIS CRISIS
TOGETHER.**

INDUSTRY'S BATTLE AGAINST
COVID-19.

You should I sanitize your hands all the time! Do you know why?

Without noticing, we touch our mouth, eyes and nose with our hands an average of 23 times per hour.

We touch objects, surfaces and people with our hands an average of 3 times per hour.

The droplets left behind by our saliva, sneezing, coughing or by our hands can remain on surfaces for hours or even days.

In addition to sanitizing hands, there should also be daily cleaning of personal objects and common objects.

Avoid touching your mouth and hand also avoid contact with water fountains, door handles and handrails.

If everyone respects the prevention tips, we can overcome this crisis.
